**VMware Certified Professional 6 – Data
Center Virtualization Delta Exam**

Version: 7.4

QUESTION NO: 1

An administrator wants to provide users restricted access. The users should only be able to perform the following tasks:

Create and consolidate virtual machine snapshots

Add/Remove virtual disks

Snapshot Management

Which default role in vCenter Server would meet the administrator's requirements for the users?

- A.**
Virtual machine user
- B.**
Virtual machine power user
- C.**
Virtual Datacenter administrator
- D.**
VMware Consolidated Backup user

Answer: B

Explanation:

Virtual Machine Power User is a sample role that grants a user access rights only to virtual machines; can alter the virtual hardware or create snapshots of the VM.

QUESTION NO: 2

Which two roles can be modified? (Choose two.)

- A.**
Administrator

B.

Network Administrator

C.

Datastore Consumer

D.

Read-Only

Answer: B,C**Explanation:**

It is a common knowledge that you cannot modify Administrator role and grant whatever privileges you like. Same is the case with read-only. This role is created solely for ready only purposes. So you are left with two viable options – Network administrator and Datastore consumer both of which can be modified to add or delete privileges according to your specifications.

QUESTION NO: 3

An administrator with global administrator privileges creates a custom role but fails to assign any privileges to it.

Which two privileges would the custom role have? (Choose two.)

A.

System.View

B.

System.Anonymous

C.

System.User

D.

System.ReadOnly

Answer: A,B**Explanation:**

When you add a custom role and do not assign any privileges to it, the role is created as a Read Only role with three system-defined privileges: System.Anonymous, System.View, and System.Read.

QUESTION NO: 4

An administrator wishes to give a user the ability to manage snapshots for virtual machines.

Which privilege does the administrator need to assign to the user?

- A.**
Datastore.Allocate Space
- B.**
Virtual machine.Configuration.create snapshot
- C.**
Virtual machine.Configuration.manage snapshot
- D.**
Datastore.Browse Datastore

Answer: A

Explanation:

Datastore.Allocate space allows allocating space on a datastore for a virtual machine, snapshot, clone, or virtual disk.
