## Exam A

### QUESTION 1

You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. According to the requirement of your company, you have to install Microsoft Dynamics NAV 2009 in the network. During the deployment, you use one software distribution point and publish the installation package to the group policy objects. But an employee named Jason reports that he still does not have Microsoft Dynamics NAV installed. So what is the reason for this?

- A. This is because the installation package is corrupted
- B. This is because the software distribution point is not accessible.
- C. This is because the corresponding group policy object does not run.
- D. This is because the client computers do not meet the minimum requirements for the installation.

**Correct Answer: C**

**Section: (none)**

**Explanation**

**Explanation/Reference:**

### QUESTION 2

You work in an international company which is called Wikigo. And you're employed as the developer of Microsoft Dynamics NAV. There are two departments in your company, one is Sales department, another is Account department. The company manager assigns a task to you that you implement Microsoft Dynamics NAV 2009. When you do this, you must make sure that each division uses its own instance of the database server; users in one of the divisions are not bound to certain computers. So which deployment configuration do you suggest?

- A. You suggest one GPO, One SDP, and one installation package.
- B. You suggest one GPO, Two SDPs, and one installation package.
- C. You suggest two GPOs, Two SDPs, and two installation packages with different configuration files.
- D. You suggest two GPOs, One SDP, and two installation packages with different configuration files.

**Correct Answer: D**

**Explanation**

**Explanation/Reference:**

### QUESTION 3

You work in an international company which is called Wikigo. And you're employed as the Developer for Microsoft Dynamics NAV. According to the requirements of your company manager, Microsoft Dynamics NAV 5.0 has been installed throughout your company. Now the company has a new plan that is to implement Microsoft Dynamics NAV 2009 instead of Microsoft Dynamics NAV 5.0. But at present you are connecting to external components by using the NAS component of Microsoft Dynamics NAV 5.0. In working with external components using NAS in the two-tier architecture, which drawback does the Server tier in the three-tier architecture enable you to eliminate?

- A. The Server tier in the three-tier architecture enables you to eliminate the drawback of losses of data.
- B. The Server tier in the three-tier architecture enables you to eliminate the drawback of necessity to use the NAS user interface.
- C. The Server tier in the three-tier architecture enables you to eliminate the drawback of limitation to only one process at a time.
- D. The Server tier in the three-tier architecture enables you to eliminate the drawback of overload of the database management system.

**Correct Answer: C**
